DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Brown (US 6,543,337). Note, Brown discloses a fan (10) which “sucks or blows” and tube (6) or channel “may” be used in conjunction with the fan, but does not have to be used at all. Thus, the features of the instantly rejected claims are structurally met by the reference.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Belknap, et al. (US 6,105,486) or Kwong (US 5,126,534) in view of Brown (US

Art Unit: 1761

6,543,337) or Lin (US 6,418,835). The patents to Belknap, et al. and Kwong disclose the claimed subject matter except for a fan in the housing for cooling. The patents to Brown and Lin both teach it to be old and well known in the art to use a fan in a housing for cooling. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided the housing of either Belknap, et al. or Kwon with a fan in the manner suggested by Brown or Lin in order to cool the surfaces of the outer casing, if desired.

Response to Arguments

Applicant's arguments with respect to claims 18-29 have been considered but are moot in view of the new ground of rejection.

Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
